

ASE230 Project 2 – Laravel API, Docker, Hugo

Welcome to the portfolio site for Project 2. Here you'll find:

- Laravel REST API reimplementation of the dealership service (from Project 1)
- Dockerized deployment with one-command scripts
- Hugo-based documentation and portfolio pages
- GitHub Actions configuration for automatic GitHub Pages deployment

Use the navigation to explore documentation and portfolio highlights. Update the baseURL in `presentation/config.toml` to your GitHub Pages URL before publishing.

Docs

- Documentation for both Project 1 (PHP/PDO) and Project 2 (Laravel/Sanctum), including endpoints, data models, auth, deployment, and testing helpers.
